STUDENT LEARNING OUTCOMES

After completion of the course, students will be able to

- Analyze and synthesize the concepts of limits, continuity, and differentiation from a graphical, numerical, analytical and verbal approach, using correct notation and mathematical precision.
- Evaluate the behavior of graphs in the context of limits, continuity and differentiability.
- Recognize, diagnose, and decide on the appropriate method for solving applied real world problems in optimization, related rates and numerical approximation.

PREREQUISITES

Mathematics 43 (with a grade of C or better), or satisfactory score on Calculus Placement Exam within the past calendar year.

HOMEWORK

Homework will be assigned weekly and late work will not be accepted. **You will turn in your homework assignments on WebAssign, www.webassign.net.**

Each homework assignment is worth **4 points** and **six lowest scores will be dropped**.

Please read "Homework Guidelines."

EXAMS

There will be three exams. Each exam is worth 100 points. The exams are closed book. You may use **one 3" by 5" index card (both sides)** for notes. There are **no dropped exams**. **NO CALCULATOR is allowed.**

Missed Exam: There are **no make-up exams**, regardless of why you missed it. If you are unable to take the exam at the scheduled time due to illness or an emergency, I will use your percentage from the final exam to compute your score for the missed exam. If a second exam is missed, you will get a zero.

FINAL EXAMS
