DE ANZA COLLEGE PRE-DESIGN / PROGRAMMING SERVICES

Goals & Considerations

Project Goals:

- Improve Student Experience and Access to Services
- Improve Visibility and Wayfinding to Services
- Inclusive and Welcoming to Potential New and Existing Students
- Works with Other Service and Function Locations
- Serve the students through an equity lens

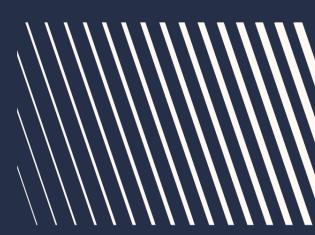

Project Considerations:

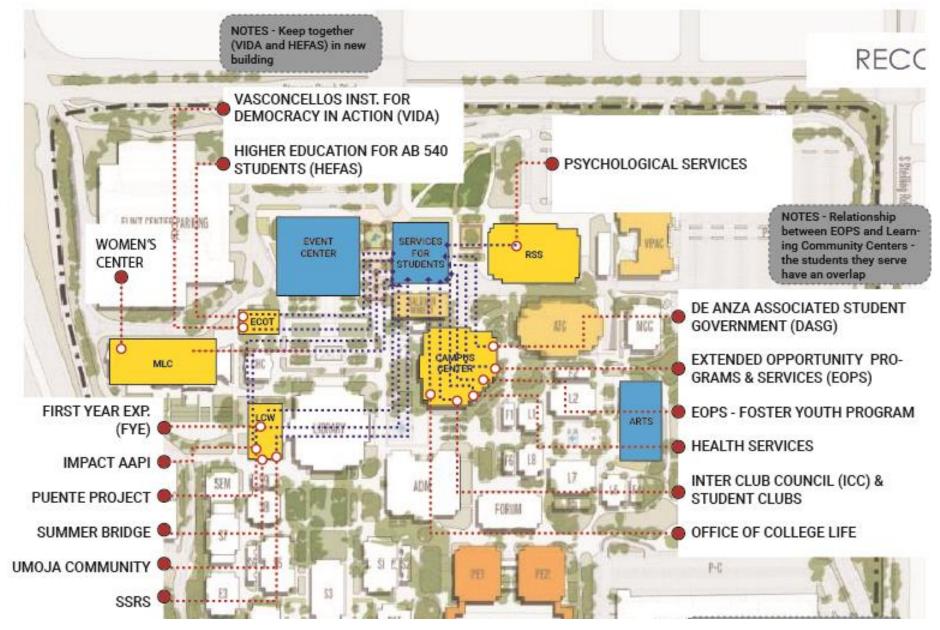

- Given that this building will be front and center on campus, what parts of its program should be the most prominent?
- Are all of the appropriate programs included in our current program understanding?
- Some of the existing programs on campus have inadequate space currently, according to their users – how much expansion of those programs can the project accommodate?
- What amount of expansion for programs that don't currently exist be planned for?

Master Plan Recap
